

Pressure Gauges

63 mm Diameter

Heavy duty glycerine filled pressure gauges with hermetically sealed brass case to prevent leakage and condensation. Gauges are glycerine filled for longer life and good dampening on pulsating pressures which occur in hydraulic Systems.

The case also incorporates a safety blow-out plug which relieves in the event of accidental overload. Gauges have dual scale bar and psi to BSEN 837.1. Accuracy $\pm 1.6\%$ of full scale at 20 °C.
